

ELENCO 10 PUBBLICAZIONI PIÙ SIGNIFICATIVE - F.M. RIJLI

Kitazawa T, Machlab D, Joshi O, Maiorano NA, Kohler H, Ducret S, Gezelius H, Sonesson C, Papasaikas P, López-Bendito G, Stadler MB, **Rijli FM** (2021) A unique bipartite Polycomb signature regulates stimulus response transcription during development. *Nature Genetics*, 53(3):379-391.

Minoux M, Holwerda S, Vitobello A, Kitazawa T, Kohler H, Stadler M, **Rijli FM** (2017) Gene Bivalency at Polycomb Domains Regulates Cranial Neural Crest Positional Identity. *Science*, 355(6332), eaal2913. (full article)

Di Meglio T, Kratochwil CF, Vilain N, Loche A, Vitobello A, Yonehara K, Hrycaj SM, Roska B, Peters AH, Eichmann A, Wellik D, Ducret S, **Rijli FM** (2013) Ezh2 orchestrates topographic tangential migration and connectivity of precerebellar neurons. *Science*, 339(6116):204-7.

Vitobello A, Ferretti E, Lampe X, Vilain N, Ducret S, Ori M, Spetz JF, Selleri L, **Rijli FM** (2011) Hox and Pbx factors control retinoic acid synthesis during hindbrain segmentation. *Developmental Cell*, 20(4):469-82.

Erzurumlu, R., Murakami, Y., and **Rijli F.M.** (2010) Mapping the face in the somatosensory brainstem. *Nature Reviews Neuroscience*, 11(4):252-63.

Oury, F., Murakami, Y., Renaud, J-S, Pasqualetti, M., Charnay, P., Ren, S-Y., and **Rijli F.M.** (2006) Hoxa2 and rhombomere dependent development of the mouse facial somatosensory map. *Science*, 313(5792):1408-13. (full article)

Santagati, F., and **Rijli F.M.** (2003). Cranial neural crest and the building of the vertebrate head. *Nature Reviews Neuroscience*, 4, 806–818.

Pasqualetti M., Neun, R., Davenne M., and **Rijli F.M.** (2001) Retinoic acid rescues inner ear defects in Hoxa1 deficient newborn mice. *Nature Genetics*, 29(1):34-9. (full article)

Davenne, M., Maconochie, M.K., Neun, R., Pattyn, A., Chambon, P., Krumlauf, R., and **Rijli, F.M.** (1999) Hoxa2 and Hoxb2 control dorsoventral patterns of neuronal development in the rostral hindbrain. *Neuron*, 22, 677-691.

Rijli, F.M., Mark, M., Lakkaraju, S., Dierich, A., Dollé, P., and Chambon, P. (1993). A homeotic transformation is generated in the rostral branchial region of the head by disruption of Hoxa-2, which acts as a selector gene. *Cell*, 75, 1333-1349.

BIBLIOGRAFIA COMPLETA- F.M. RIJLI

Genescu I, Aníbal-Martínez M, Kouskoff V, Chenouard N, Mailhes-Hamon C, Cartonnet H, Lokmane L, **Rijli FM**, López-Bendito G, Gambino F, Garel S (2022) Dynamic interplay between thalamic activity and Cajal-Retzius cells regulates the wiring of cortical layer 1. *Cell Reports*, 12;39(2):110667.

Pumo GM, Kitazawa T, **Rijli FM** (2022) Epigenetic and Transcriptional Regulation of Spontaneous and Sensory Activity Dependent Programs During Neuronal Circuit Development. *Front Neural Circuits* 16:911023.

Rijli, F.M., Dollé, P., Fraulob, V., LeMeur, M., and Chambon, P. (1994). Insertion of a targeting construct in a Hoxd-10 allele can influence the control of Hoxd-9 expression. *Dev Dynamics*, 201, 366-377.

Rijli, F.M., Mark, M., Lakkaraju, S., Dierich, A., Dollé, P., and Chambon, P. (1993). A homeotic transformation is generated in the rostral branchial region of the head by disruption of Hoxa-2, which acts as a selector gene. *Cell*, 75, 1333-1349.

Rijli, F.M., De Lucchini, S., Ciliberto, G. and Barsacchi, G. (1993). A Zn-finger protein, Xfin, is expressed during cone differentiation in the retina of the frog *Xenopus laevis*. *Int. J. Dev. Biol.*, 37, 311-317.

De Lucchini, S., **Rijli, F.M.**, Ciliberto, G. and Barsacchi, G. (1991). A *Xenopus* multifinger protein, Xfin, is expressed in specialized cell types and is localized in the cytoplasm. *Mech. Dev.* 36, 31-40.

Vignali, R., **Rijli, F.M.**, Batistoni, R., Fratta, D., Cremisi, F. and Barsacchi, G. (1991) Two dispersed highly repeated DNA families of *Triturus vulgaris meridionalis* (Amphibia, Urodela) are widely conserved among Salamandridae. *Chromosoma*, 100, 87-96.

Moore, S.K., **Rijli, F.** and Appella, E. (1990). Characterization of the mouse 84 kDa heat shock protein gene family. *DNA and Cell Biology* 9, 387-400.
