CLASSE DI SCIENZE FISICHE, MATEMATICHE E NATURALI

Venerdì 10 novembre 2023 ore 14

Conferenze di Classe

CATEGORIA II (Astronomia, Geodesia, Geofisica e appl.)

Paola Malanotte (Massachusetts Institute of Technology): *Lorenz, predictability and solitons*

CATEGORIA III (Fisica, Chimica e appl.)

Alessandra Buonanno (Max Planck Institute for Gravitational Physics): *Gravitational Waves as Probes of Astrophysics, Gravity and Fundamental Physics*

Marco Leona (Metropolitan Museum of Art): *Between Materials and Meanings: Research at the Interface of Science and Art*

Peter Zoller (University of Innsbruck): *Quantum Computing and Quantum Simulation during the inauguration*

CATEGORIA IV (Geoscienze)

A. M. Celal Şengör (Istanbul Technical University): *The essence of mountain-building and the contribution of Italian geology to its understanding*

CATEGORIA V (Scienze Biologiche e applicazioni)

Rory Collins (University of Oxford): *Reliable evaluation of medical treatments*

Paolo Vineis (Imperial College): *The health effects of climate change*
